

Rocket Ship Penny

Rocket Ship Penny,
was an astronaut mouse,
who lived on the moon,
in a purple-green house.

A few seconds later,
she arrived at the door,
crawled under the chair,
with her back to the floor.

She would come down to earth,
when it was time to repair,
a yellow or green,
old dentist chair.

It did not take long,
to fix the old chair,
Tommy hopped with joy,
next was the bear.

One day Tommy,
the cheerful Bunny,
sat in a broken chair,
it was not very funny.

Rocket Ship Penny,
saved another toothy day,
jumped into her Rocket Ship,
and was off on her way.

The old dentist chair,
would not move back or recline,
only Rocket Ship Penny,
could make it all fine.
